

PATIENT ENTRANCE FORM
(PLEASE PRINT)

Name _____ Date _____

Address _____ City _____

Province _____ Postal Code _____ E-mail _____

Home Tel _____ Work phone _____ Cell phone _____

Date of Birth (D/M/Y) ____/____/____ Age _____ Sex M / F Martial Status – S M D W

Weight _____ Height _____ Occupation _____ Pregnant? _____

Spouse's or Parent's Name _____ No. of children _____

Who may we thank for referring you to our office? _____

Have you ever had Chiropractic Care before? Yes / No If so, when? _____

List your complaints according to severity of pain:

1. _____ 2. _____

3. _____ 4. _____

Contact information of your family doctor:

Name _____ Address/Phone _____

Other Doctor(s) seen for the above conditions:

1. Name _____ Address/Phone _____ When? _____

2. Name _____ Address/Phone _____ When? _____

Are you taking any medication? Yes / No What kind? _____

Please list ANY previous surgeries, falls or accidents you may have had in the past:

Check the following conditions you may have had or do have now:

- | | | |
|--|--|--|
| <input type="checkbox"/> Allergy | <input type="checkbox"/> Gout | <input type="checkbox"/> Neck Pain/Stiffness |
| <input type="checkbox"/> Arthritis | <input type="checkbox"/> Headaches | <input type="checkbox"/> Numbness or pain in arms/legs/hands |
| <input type="checkbox"/> Back Pain/Stiffness | <input type="checkbox"/> Heart Disease | <input type="checkbox"/> Ringing in ears |
| <input type="checkbox"/> Cancer | <input type="checkbox"/> Heart Attack | <input type="checkbox"/> Sinus Problems |
| <input type="checkbox"/> Diabetes | <input type="checkbox"/> High Blood Pressure | <input type="checkbox"/> Spinal curvature |
| <input type="checkbox"/> Dizziness | <input type="checkbox"/> Low Blood Sugar | <input type="checkbox"/> Stroke |
| <input type="checkbox"/> Chronic Fatigue | <input type="checkbox"/> Migraines | <input type="checkbox"/> Others _____ |

Please place a vertical mark on the line below to rate your pain:

Please mark the area(s) of the body where you do not feel well

Notice to patient:

In this clinic, as a service to you, also provides additional services and products, including but not limited to acupuncture, massage therapy, nutritional consultations, dietary supplements, custom-made orthotics, fat burning & detox programs and personal training programs. The above services and products are recommended according to individual needs.

You are under no obligation to use or purchase the above services and products at our clinic. In addition, regardless whether you prefer to use our additional services/products or not, you nevertheless have the best of our care.

I, _____ have read and understand the above statements.

CONSENT TO CHIROPRACTIC TREATMENT

It is important for you to consider the benefits, risks and alternatives to the treatment options offered by your chiropractor and to make an informed decision about proceeding with treatment.

Chiropractic treatment includes adjustment, manipulation and mobilization of the spine and other joints of the body, soft-tissue techniques such as massage, and other forms of therapy including, but not limited to, electrical or light therapy and exercise.

Benefits

Chiropractic treatment has been demonstrated to be effective for complaints of the neck, back and other areas of the body caused by nerves, muscles, joints and related tissues. Treatment by your chiropractor can relieve pain, including headache, altered sensation, muscle stiffness and spasm. It can also increase mobility, improve function, and reduce or eliminate the need for drugs or surgery.

Risks

The risks associated with chiropractic treatment vary according to each patient's condition as well as the location and type of treatment.

The risks include:

- **Temporary worsening of symptoms** – Usually, any increase in pre-existing symptoms of pain or stiffness will last only a few hours to a few days.
- **Skin irritation or burn** – Skin irritation or a burn may occur in association with the use of some types of electrical or light therapy. Skin irritation should resolve quickly. A burn may leave a permanent scar.
- **Sprain or strain** – Typically, a muscle or ligament sprain or strain will resolve itself within a few days or weeks with some rest, protection of the area affected and other minor care.
- **Rib fracture** – While a rib fracture is painful and can limit your activity for a period of time, it will generally heal on its own over a period of several weeks without further treatment or surgical intervention.
- **Injury or aggravation of a disc** – Over the course of a lifetime, spinal discs may degenerate or become damaged. A disc can degenerate with aging, while disc damage can occur with common daily activities such as bending or lifting. Patients who already have a degenerated or damaged disc may or may not have symptoms. They may not know they have a problem with a disc. They also may not know their disc condition is worsening because they only experience back or neck problems once in a while.

Chiropractic treatment should not damage a disc that is not already degenerated or damaged, but if there is a pre-existing disc condition, chiropractic treatment, like many common daily activities, may aggravate the disc condition.

The consequences of disc injury or aggravating a pre-existing disc condition will vary with each patient. In the most severe cases, patient symptoms may include impaired back or neck mobility, radiating pain and numbness into the legs or arms, impaired bowel or bladder function, or impaired leg or arm function. Surgery may be needed.

- **Stroke** – Blood flows to the brain through two sets of arteries passing through the neck. These arteries may become weakened and damaged, either over time through aging or disease, or as a result of injury. A blood clot may form in a damaged artery. All or part of the clot may break off and travel up the artery to the brain where it can interrupt blood flow and cause a stroke.

Many common activities of daily living involving ordinary neck movements have been associated with stroke resulting from damage to an artery in the neck, or a clot that already existed in the artery breaking off and travelling up to the brain.

Chiropractic treatment has also been associated with stroke. However, that association occurs very infrequently, and may be explained because an artery was already damaged and the patient was progressing toward a stroke when the patient consulted the chiropractor. Present medical and scientific evidence does not establish that chiropractic treatment causes either damage to an artery or stroke.

The consequences of a stroke can be very serious, including significant impairment of vision, speech, balance and brain function, as well as paralysis or death.

Alternatives

Alternatives to chiropractic treatment may include consulting other health professionals. Your chiropractor may also prescribe rest without treatment, or exercise with or without treatment.

Questions or Concerns

You are encouraged to ask questions at any time regarding your assessment and treatment. Bring any concerns you have to the chiropractor's attention. If you are not comfortable, you may stop treatment at any time.

Please be involved in and responsible for your care. Inform your chiropractor immediately of any change in your condition.

DO NOT SIGN THIS FORM UNTIL YOU MEET WITH THE CHIROPRACTOR

I hereby acknowledge that I have discussed with the chiropractor the assessment of my condition and the treatment plan. I understand the nature of the treatment to be provided to me. I have considered the benefits and risks of treatment, as well as the alternatives to treatment. I hereby consent to chiropractic treatment as proposed to me.
